

# Mooj VirtueMart ProSearch

Mooj VirtueMart ProSearch is a professional search component for the Joomla shopping cart „Virtuemart“. It consists of a search suggestions module for the frontend, an AJAX profi-search for the backend and the main component..

ProSearch is a so-called „out of the box“software and installs all parts at a time.

ProSearch is available in a commercial and a non-commercial version.

The non-commercial version is available free at charge and can be downloaded via [Mooj.org](http://Mooj.org).

The non-commercial version contains a copyright back link. We consider it as a small “thank you” for the free version.

Further, the non-commercial version of ProSearch has no AJAX admin search but a simple admin search module

**Please note that this extension works only with the VirtueMart component!**

## What can I do with this extension?

### Search-Suggestion-Modul for the frontend

With this module you can search for VirtueMart products.

While typing the search term, product suggestions will be displayed in a separate window.

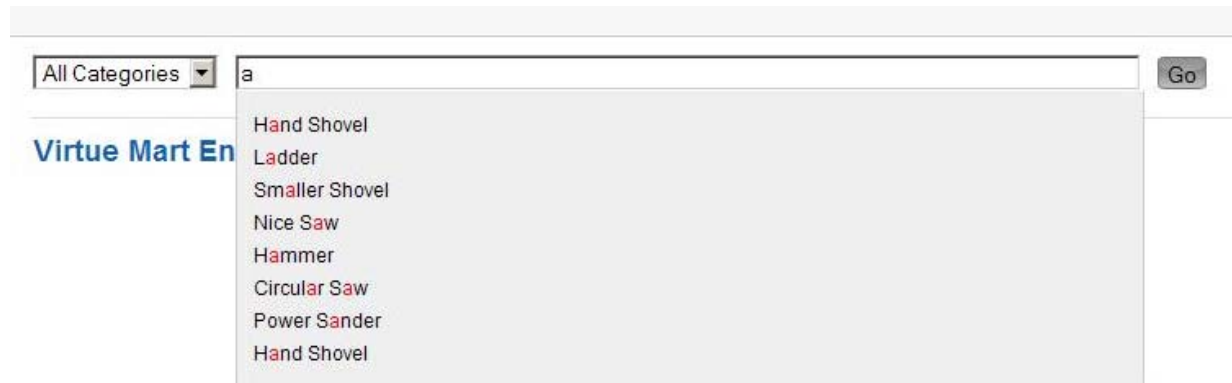

The suggestions module...

- can be applied to the entire range of products or to product categories. The specification of a category can be applied at the drop down left hand to the search box.
- highlights' the sequence of letters found in the suggestion window.
- is visually customizable easily vua the module parameters.
- supports multilingualism (eg. JoomFish)
- is based on none Javascript framework so there will be fewer conflicts with other scripts. The module script is optimized in size and performance.
- suggestions may be selected with the mouse and the cursor keys.

## AJAX-Admin-Search

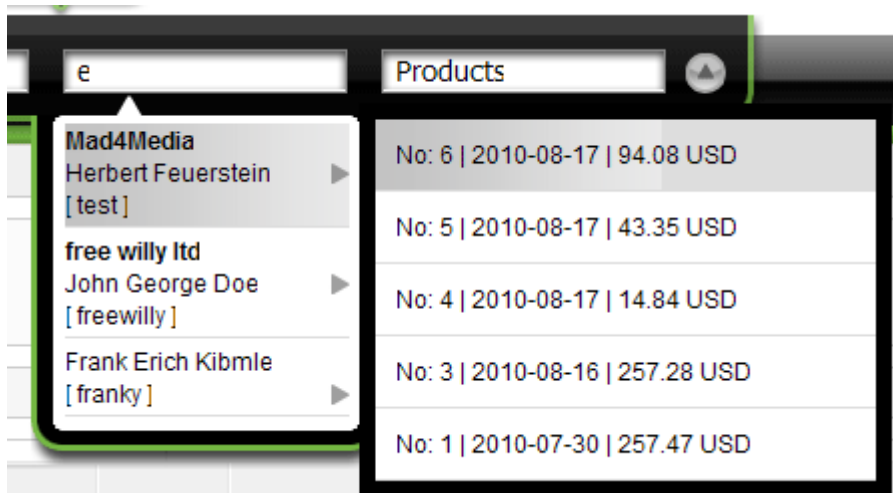

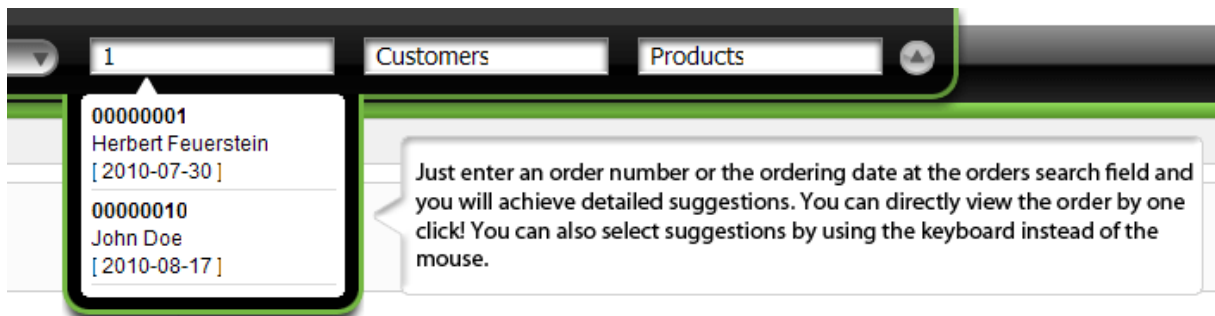

The AJAX-Admin-Search is the heart of ProSearch. It saves a lot of time in your daily work with VirtueMart. It is made to receive important information from anywhere in the admin area and to link you to the appropriate VirtueMart masks with one click.

Main advantages at a glance:

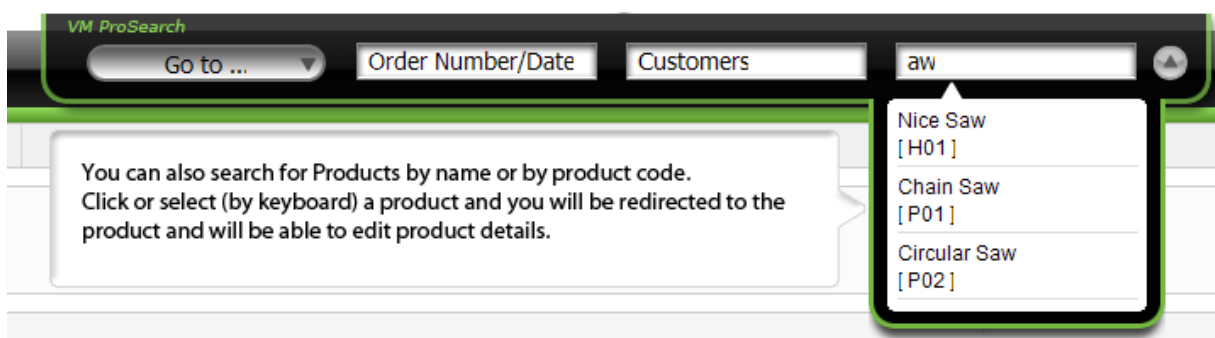

- AJAX admin search panel with suggestions.
- The AJAX search panel works fine with extended layout of Virtuemart.
- You can directly access the native search of Virtuemart or use suggestions.
- Supports selection by keyboard
- AJAX Panel can be minimized and expanded with remember function
- Customizable at the configuration (Max. suggestions, access control for config. etc)
- AJAX Panel can be turned off for individual components.
- You can create custom short links for a faster workflow.

The AJAX-Admin-Search in detail:

The most powerful search function is the customer search. Enter few letters and ProSearch searches for company name, username and normal name and gives you detailed suggestions. You can hover over suggestions and view the latest orders of a customer. One click and you get to the customer details or to the appropriate order. You can also select suggestions by using the keyboard instead of the mouse.

## Light Version

ProSearch gibt es auch in einer kostenlosen Light Version. Die Light Version enthält einen Copyright Link in der Frontend. Wir betrachten dies als eine kleine „thank you“ für die kostenlose Version.

Weiterhin, die nicht-kommerzielle Version von ProSearch hat keine AJAX Admin-Suche, sondern ein einfaches Admin-Suchmodul.

Sie müssen nicht die Light Version deinstallieren, bevor Sie auf PRO upgraden!  
Einfach PRO installieren und alle Einstellungen werden beibehalten.

**Wir bieten keine Unterstützung für die Light Version!**

## Technical Requirements Pro and Light

- Joomla 1.5x +
- Apache 2.x + Server (ProSearch wurde nur auf Apache getestet)
- PHP 5+ (mögliche PHP 4.x+ **Test it with the light version!**)
- MySQL 4+
- Virtuemart muss installiert sein.
- Getestet Kompatibilität mit Admin Template „Khepri“.  
Keine Garantie für andere Admin Templates.
- Light Version ist nicht kompatibel mit dem erweiterten Layout von VirtueMart!
- Javascript und Cookies müssen aktiviert sein.
- Standardkompatibles Joomla Template.
- Schreiben und Lesen von Berechtigungen über das Joomla Framework.

### (Browser-) Kompatibilität:

## Comparison and Prices
