

Technical requirements and compatibility of Mooj Proforms.

Mooj Proforms is the commercial follow up of Mad4Joomla Mailforms. Proforms is a very easy to use Joomla component for creating forms. This component comes with a lot more improved usability and endless new professional functionality. Proforms is thus ideally suited for beginners and also meets the needs of designers and experts.

Proforms comes with a time based service model.

Technical requirements

- Joomla 1.5x +
- Apache 2.x + Server (might work on other servers. Proforms has only been tested on Apache)
- PHP 4.3+ (might work on PHP 4.0+)
- MySQL 4+
- Enabled GD and TrueType library.
- Server user rights with enabled reading and writing opportunity.
- Sendmail enabled or a working SMTP connection via Joomla's backend.
- Enabled JavaScript and Cookies (Admin)
- Standard compliant Joomla Template

Recommended: PHP5 and MySQL 5

(Browser-) Compatibility

Frontend	Backend
Internet Explorer 6+ Firefox 2+ Chrome Safari 3+ Opera 9+	Internet Explorer 7+ Firefox 3+ Chrome Safari 3+ Opera 9+
	No admin compatibility with IE6 and FF2!

Requirements to obtain service

The access to the helpdesk goes by the admin panel of Proforms. For technical reasons of communication the Joomla installation must be publicly available. The service can not be provided if the Joomla installation is protected by a firewall or on a local server environment which is not reachable by an official domain.
